

THE GOLD STANDARD

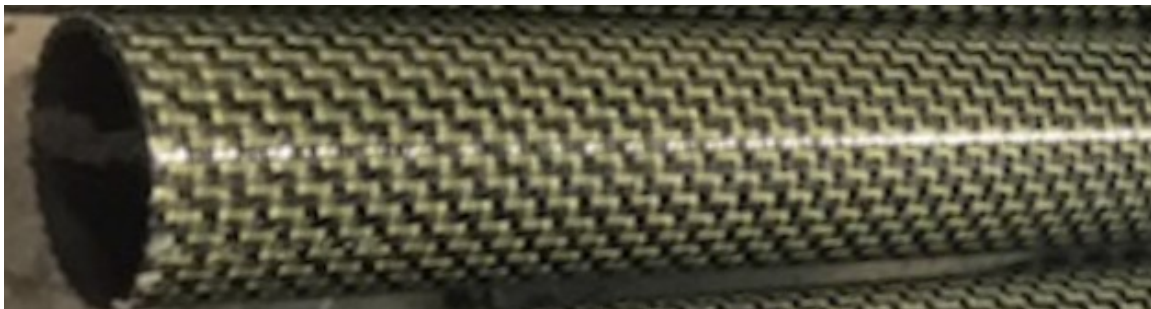

The premium CARBON KEVLAR non telescopic actuator pole for unlocking semi-automatic twist locks

TECHNICAL SPECIFICATIONS — 4 x 9'6

Tube Material	Carbon Kevlar
Weight	2.4 kilograms/5 pounds 5 ounces
Length	7.7 metres/25'3"
Capability	Unlock semi-automatic twist locks 4 x 8'6 and 4 x 9'6 high

FEATURES

The Gold Standard is made of CARBON KEVLAR. This is a blend of carbon fibre and kevlar which incorporates the strength and lightness of carbon fibre with the impact resistance of kevlar. It has been developed in conjunction with stevedores as a non telescopic, light weight, high performance alternative to traditional actuator poles.

UNLOCKING TOOLS

The Gold Standard comes with whichever tool unlashing personnel prefer. Two options are currently available but we can manufacture to your specific requirements.
