

THE GOLD STANDARD

The premium CARBON KEVLAR non telescopic actuator pole for unlocking semi-automatic twist locks

FOLLOW THESE SIMPLE STEPS TO GET THE BEST FROM THE GOLD STANDARD NON TELESCOPIC ACTUATOR POLE

1. TRAIN STAFF HOW TO USE THE GOLD STANDARD

Go online, visit you tube and search for 'Competitive Procurement Channel' to get access to all the online training and maintenance videos

2. STORE THE GOLD STANDARD IN AN EQUIPMENT RACK

Equipment racks prevent accidental damage or theft. Store the Gold Standard in an equipment rack out of direct sunlight to maximise the life of the product.

3. ALLOCATE THE GOLD STANDARD TO STAFF

Have the supervisor give the Gold Standards out at the start of the shift and receive them back at the end of the shift—this will minimise damage and give staff ownership for their use of the Gold Standard.
